Financial Regulations

The Council received and reviewed the new model Financial Regulations document from the National Association of Local Councils. The Clerk reported attending training input on 18th June arranged by ERNLLCA with Steve Parkinson who was involved in the development of the new document. It was emphasised at the training that the model is a template to help Council's create their own regulations. Bold text is law and other text is guidance, to help so that the regulations can be adapted to suit the Council's current way of working. The document contained, in a number of places, choices and values which needed to be agreed and set.

The Clerk had provided a copy of the document with recommendations highlighted in yellow and options/decisions highlighted in green. The Council discussed the regulations page by page.

The Clerk explained reasons for the recommendations made in yellow and also provided information during the discussion on current Council processes.
